

Hayden's Pull Weed Wiper

How it operates:

It is powered by a 12 volt battery with an electric motor. It has an air compressor which pressurizes the 3 gallon plastic Round Up tank. When the tank is pressurized the Round Up is forced down the clear plastic tubes to the white PVC pipe which is directly over an 8 foot drip-proof roller applicator in the

Our Hayden Pull Weed Wiper is light weight & easy to operate.

This Wiper is constructed mainly of aluminum with 26" bicycle tires and features a 100 inch detachable aluminum handle for easy transport.

For the safety of the operator & the vines, this pull model was designed so that the operator would not walk through the Round-Up while being applied to the weeds.
